Workflow helps you keep a track of the status of all applications to your organisation for grant funding.

specific information

thankQ's Grants module helps you record all manner of information specific to your organisation, thus enabling you to fulfil your Equal Opportunities responsibilities. Information such as ethnicity, gender, age and employment can all be recorded.

paying grants

thankQ's Grants module enables you to record banking details and set up payment schedules for successful applicants for grant funding. The module also facilitates the process of approving and making payments, and can be integrated with your finance systems.

reporting

The Grants module allows you to collate information so that you can produce management reports on grant distribution, committee activity and spend on your various funding programmes.

The definition of 'managing grants' varies between organisations. thankQ's Grants module is designed to help you manage the process of distributing grants.

assessing grant applications

Each organisation assesses the merits of applications for grant funding differently. thankQ can be configured to fit with your existing terminology and processes, to allow you to work most effectively.
