

# thankQ eClient / Membership

A fully integrated series of online web pages for allowing a contact (e.g. a supporter, donor, client or member of your organisation) to login and manage their 'account' details. The content within the web site is controlled directly from ThankQ (no need for any web technical programming staff – web pages are changed by your appropriate ThankQ user).

## Features:

- Web Page Content Managed via ThankQ
- Secure SSL Encrypted end to end processing
- Automated Email Confirmation
- Automated Password management
- Definable Content for viewing and editing:
  - Personal details; name, address, tel., mobile, email, etc.
  - Specific profiles
  - Specific mailing preferences
  - Donation and Pledge history
  - Targeted messages
- Mapping of collected information to contact form fields, profiles, or mailing preferences
- Ability to offer other ThankQ eModule features; Donate online, Event ticket purchase, Raffle ticket purchase, Membership renewal / purchase, Community pages, etc.
- Fully integrated with ThankQ BackOffice Web Holding pens for authorised information

## Secure SSL Encrypted Processing

From the moment the contact initiates the process until the moment they leave the Confirmation Page, ThankQ eClient / Member operates in a Secure SSL Encrypted environment. This assures your clients of safe conventional transacting.

## My Profile

## BackOffice Holding Pen

When the information has been successfully processed, the contact is issued with an on screen Confirmation (which is also automatically emailed to them). All of the completed information automatically arrives in the ThankQ BackOffice Holding Pen. All that remains is to process the changed contact information and accept their requirements; such as a mailing preference, profile update or address change.

## Content Managed via ThankQ

ThankQ BackOffice provides content management of the web site pages that enables information entered into the web pages to be directed to fields within ThankQ. This means you are able to completely setup and define how information flows from the web pages to fields, profiles or mailing preferences in ThankQ.
